

July 2011 Features

EDITORIAL DEADLINE: 30 MAY

BOOKING DEADLINE: 26 MAY

MATERIAL DEADLINE: 6 JUNE

PUBLISHED DATE: 23 JUNE

Cold Chain & Refrigeration

Cold Chain & Refrigeration management is an important element of the transport and logistics industry. Industries from pharmaceuticals to food manufacturing require controlled-temperature transport to keep their products in top shape. This feature will include case studies from businesses sharing their cold chain techniques, as well as top tips for managers implementing new technologies.

It will also cover the challenges of multi-temperature warehousing and transport and outline some of the new products on the market. If you have any case studies, news or products pertaining to the Cold Chain industry, send them through to the editor at the below email address.

Supply Chain & Logistics Strategy, Planning & Execution

This feature provides a manager's guide to moving products through the supply chain effectively. You're only as good as your strategy, planning and execution system.

This section is a must-read for companies starting-out in the logistics industry, and those

interested in reaping the rewards of information management. Send your case studies, news and product through to the editor.

Mercury Awards winners... Where are they now?

Now in its 6th year, the Logistics & Materials Handling Mercury Awards has a strong history of best practice case studies in logistics management.

Winners have included Linfox and Linfor, Power Docs & Freight, Costa Logistics, Linfox Logistics, NQX Freight System, Blackmores, Bega Cheese, Coca-Cola Amatil, Obe Beef, AUNEW Group Holdings, Hills Transport, Peacock Bros, The Hunter Valley Coal Chain Logistics Team, Smith's Pepsico and more. The July issue of Logistics & Materials Handling will include interviews with past winners.

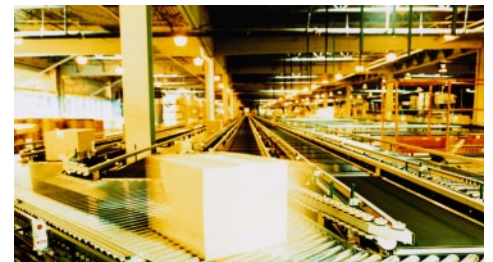

Forklifts & Lifting

Constant improvements in forklift, stacker and loader design ensure safer materials handling and better use of warehouse space. Editorial in the July issue will examine the

emerging trend of hybrid forklifts, the growing use of LPG, and in-depth interviews with leading experts in the Australian industry.

Materials Handling – Coverage each issue

- Bulk Handling
- Data Capture & Labelling
- Factory Materials Handling
- Forklifts, Stackers & Trolleys
- Handling Hazardous Goods
- Packaging & Packaging Equipment
- Supply Chain Management & Logistics
- Warehousing Equipment
